## CRANBERRIES & SWEET POTATOES

Today students in grades 2-6 had a chance to taste cranberries and sweet potatoes. While holiday table favorites, these brightly colored foods are not always kids' favorites, but should be!

Cranberries are rich in antioxidants and phytonutrients that may protect against heart disease and cancers. Their proanthocyanidines (PAC's) prevent adhesion of certain bacteria that cause

urinary tract infections, gum disease, and plaque formation on teeth. Sweet potatoes are high in dietary fiber, have a low glycemic index to regulate blood sugar, and are packed with antioxidants, minerals, and Vitamins A, C, E, and several B vitamins.

Fresh cranberries can only be bought in the fall, but they can be frozen and this recipe can be made using the frozen berries (no thawing needed) for a refreshing summer salad!

Sweet potatoes can be bought fresh all year round. They are delicious and easy to prepare by baking, roasting, and even microwaving.

Thank you to our parent volunteers who have worked with TGS Nurse's Clinic to make today's event a success:
